

Summer Dictation Challenge

He, he ... with this challenge, you're going to make a layout (*one I made especially for the occasion, with my own design*), by scrapping "blindly". I find it very interesting to see how someone can "interpret" an information ; it sure gives some different results and/or sometimes some quirky things !! Ready to start this funny challenge ? So, just print this and let's go...

P.S : Hope my directions are clear enough and that this WON'T irritate your nerves to work this way because I want you just to have FUN !! Have a good scrapping time ;o))

Just remember ..If you want to participate ...just send me your layout before Midnight - **August, 10 th** using this mail address : scrapophax@laposte.net .

The winner will be announced on **September, 1 st** ... and will win some TOGA scrapbooking products ;o))

Supplies List :

- 12 x 12 Cardstock (I choose a white one but choose whatever *er color you like* !)
- 2 pictures Coloured or Black & White
- Some coordinated plain and patterned papers (*I only worked with different TOGA papers*)
- 1 brad , ribbon and thread
- rub-ons, chipboards etc ...
- a black signo ball pen (*or just use your printer*) for your journaling

PS : The pics & patterned paper sizes are given to you progressively through the given instructions , by respecting the diagramm " Length x Height" !

Steps :

1. Stick your photograph N°1 (14 X 10 cm) to approximately 4 cm of top edge and 5 cm of the left edge of your page. On the right of the pic, stick your piece of patterned paper N°1 (8,5 cm X 10 cm).
2. Just in lower part of your pic N°1, stick your patterned paper band N°2 (19 X 4,5 cm), starting this time from the left edge of your page. Just in lower part, to 5 cm of left edge of your page and in the prolongation/alignment of your N°1 pic, stick a greater piece of paper printed (14 X 10,5 cm).
3. Then, to 2 cm in lower part of the N°1 pic still respecting the alignment of your photograph (*which corresponds to 5cm the left edge of your page*), stick a strip (14 X 1,5 cm) of plain paper. Then, just in lower part, another band of plain paper (14 X 3 cm) where your title will be. For my part, I used the technique of the white printed text on a coloured plain paper (*eh, eh... a technique taken from our book "Scrap in all simplicity" - explanations on page 75*), using the computer!
4. Then, on the right part of your page, just in lower part of your printed paper N°1, stick your N°2 photograph (8,5 X 11 cm) and right in lower part, a piece of paper plain (8,5 X 4 cm) where I printed my journaling.
5. To finish, just some embellishments ... a paper circle, decorated with stamps, rub-ons etc ... and maintained by a central brad (*of matched color*), stuck both on the photograph N°1 and printed paper N°1.
6. A small quotation (*about 4 lines*), printed on blank paper, cut/routed, and stuck on the right edge of printed paper N°1 (*at mid- height*), decorated with a small label (*decorated as well ...*) and fixed by a small string, ribbon or cord. Just feel free to let speak your creativity!!!

I hope that it was really "without catch of head" and that you're happy with your page .. made really quickly .. and that it will give you desire for starting another one again ; O)) Hugs,
PascaleP
